

## TOTAL APPEARANCE CONTROL BY BYK - GARDNER GMBH

### spectro - guide

- color and gloss in one unit.
- in compliance with international specification.
- color (45/0 or sphere) and 60° gloss are displayed at the same time.
- tolerances for color and gloss allow
  - quick pass / fail decisions in production.
- A sample of the same color but higher gloss level is visually perceived darker and more saturated than a low gloss sample. In order to get a uniform appearance, both attributes need to be controlled.
