

WEIGHTS OF STEEL STANDARD TOOL

Our weights of steel correspond to the valid standards of furniture testing.

- every weight has a borehole with a female thread (M6) to screw hang up eyes in.
- to guarantee a long lifetime, all of our weights are made of zinc plated steel.
- the weights are deeded for loading for example tables.
- the bigger weighst have 2 handles which are welded on at the side for easier application to the furniture.
