Test Rig for Toys Stabilitiy Ausdit / Skew Level to EN

test rig „skew level“
for the audit of toys with wheels.

The toy provided with test masses becomes on the test bench polition.

Different barriers can be mounted in order to hind the test object.

About an integrated crank the inclination of the level can be raised infinitely variable form 0 to 20°

The exact inclination is indicated about an electronic inclination device

± 0,1% of measuring exactness digitally.

Technical Data

dimensions	1250 mm x 1800 mm x 1100 mm
------------	-----------------------------

Optional

The adjustment of the inclination can also follow over a remote control so called electronic handwheel.
To the test bench different obstacle roles are provided freely positionable.
