Universal Measuring Station

**Ethernet based measurement technology
 for temperature, voltage, active power and flow rates.**

With the **Weinmann** universal remote station you can measure all the necessary consumption data, flow rates and temperatures of busehold devic according to the ISO standards, for example dish washer, refrigerator, washing machine. As a test computer, a standard Win. PC is used. Including designer and expression of a measurement report. Data aquisition hardware is built in at the test station. All sensors can be plugged at the front panel. The data are recorded on the proven DASyLab software. Evaluation according to standard modules are available or can be configured individually.

Normprüfmassen

PT 100 Spezialsensoren

Optional

- PT 100 sensors with a special extra high connecting line.
- test mass for cooling system.
- MID flow sensor 1/2 inch.
- humidity sensor 0 - 80% rel. humidity ± 2%
