Standard Tool Weights of Steel

Our weights of steel correspond to the valid standards of furniture testing.

- every weight has a borehole with a female thread (M6) to screw hang up eyes in.
- to guarantee a long lifetime, all of our weights are made of zinc plated steel.
- the weights are dedeed for loading for example tables.
- the bigger weightst have 2 handles which are welded on at the side for easier application to the furniture.

Weight and Dimensions

diameter	each Ø 300 mm
standard height at 25 kg	54 mm
standard height at 50 kg	90 mm

Available with the Weights

1 kg ± 5 g
2 kg ± 5 g
4 kg ± 5 g

For fine grading for example at push fall test.
