## Drop Test Device

Installation/backfitting in an existing test framework

- a defined test weight with a pneumatic cylinder is pulled up.
- in the deflection device can be mounted different test weights, for example Seat Impactor nach EN 1728.
- after reaching the desired drop height the test weight is activated by an electromagnetic bolt.
- the test weight meets with almost free fall on the test object.

### Accessories:

- Micro PLC-controlled cycle control for testing in accordance with DIN/EN standards.

### Technical Data

voltage of the magnet	24V dc
sensors	inductiv, non contact
air pressure	6 bar
